2. What is Jake's monthly income?
3. How much money does Jake spend on rent each month?
4. How much money in all does Jake spend on his car payments and gasoline?
(Please show your math.)
5. How much money could Jake add to his monthly savings if he spent only \$175 on food?
(Please show your math.)
6. What other expenses might Jake need to add to his budget?

Lesson 3: Make a Plan

FINISH THAT BUDGET!

Name: _____

A **budget** is a spending plan to help you manage your money. Part of making a budget is to write down the money you expect to make (**income**), and the money you expect to spend (**expenses**). Some expenses repeat each month, such as rent and food.

Directions: Read about Kayla's income and expenses. Then help complete the budget and answer the questions below.

Kayla is 11 years old. She earns \$8 a month by taking care of her younger brother while her father cleans the house. The neighbors pay her \$2 a month to collect the mail while they are away. Each month, Kayla spends \$9 on snacks and school supplies. She also puts \$1 a month into her savings.

1. If Kayla puts only 75 cents into her monthly savings, how much money would she have left over to spend each month? (Please show your math.)

2. According to the budget, how much will Kayla have in savings after a year? (Please show your math.)

3. How might Kayla save more money?
